LIST OF CONTENTS

Numbers 1–2

NINTH QUADRENNIAL SCOSTEP SYMPOSIUM ON SOLAR-TERRESTRIAL PHYSICS UPPSALA, SWEDEN, AUGUST 1997

Preface 1

Tutorial Paper
G. C. Reid: Solar variability and its implications for the human environment..... 3

Review Papers
J. M. Pap and **C. Fröhlich:** Total solar irradiance variations..... 15

J. Lean and **D. Rind:** Evaluating sun–climate relationships since the Little Ice Age..... 25

G. Rottman: Solar ultraviolet irradiance and its temporal variation..... 37

L. L. Hood: Effects of short-term solar UV variability on the stratosphere 45

H. van Loon and **K. Labitzke:** The signal of the 11-year solar cycle in the global stratosphere 53

J. D. Haigh: Modelling the impact of solar variability on climate..... 63

K. Hamilton: Dynamical coupling of the lower and middle atmosphere: historical background to current research..... 73

Tutorial Paper
G. Rostoker: The evolving concept of a magnetospheric substorm 85

Review Papers
P. Démoulin: Results on 3-D solar magnetic field, observations and models 101

S. T. Wu and **W. P. Guo:** Generation and propagation of solar disturbances: a magneto-hydrodynamic simulation..... 109

V. A. Sergeev: Solar wind induced processes in the magnetotail..... 119

S. Basu and **C. Valladares:** Global aspects of plasma structures 127

V. B. Wickwar and **H. C. Carlson:** Ionospheric and thermospheric coupling: vertical, latitudinal and longitudinal..... 141

M. A. Abdu: Coupling and energetics of the equatorial ionosphere-thermosphere system: advances during the STEP period..... 153

D. Bilitza: Science tools on the Internet—access to information, data and models 167

I. A. Galkin, D. F. Kitrosser, Z. Kecic and **B. W. Reinisch:** Internet access to ionosondes.... 181

International Geophysical Calendar 1999 187

Numbers 3–4

THERMOSPHERE-IONOSPHERE STORMS

T. Fuller-Rowell and **M. J. Buonsanto:** Preface 193

M. R. Hairston, D. R. Weimer, R. A. Heelis and **F. Rich:** Analysis of the ionospheric cross polar cap potential drop and electrostatic potential distribution patterns during the January 1997 CME event using DMSP data 195

G. G. Sivjee: Polar thermospheric response to solar magnetic cloud/coronal mass ejection interactions with the magnetosphere 207

K. Schlegel and **P. N. Collis:** The storm of January 10 1997: electrodynamics of the high latitude E region from EISCAT data 217

D. J. McEwan, D. P. Steele, F. Creutzberg and **D. D. Wallis:** The ionospheric response to the CME event of January 6–11 1997 223

M. J. Buonsanto, S. A. González, X. Pi, J. M. Ruohoniemi, M. P. Sulzer, W. E. Swartz, J. P. Thayer and **D. N. Yuan:** Radar chan study of the May 1995 storm 233

A. V. Mikhailov and **M. Förster:** Some F_2-layer effects during the January 6–11 1997 CEDAR storm period as observed with the Millstone Hill incoherent scatter facility 249

A. V. Pavlov, M. J. Buonsanto, A. C. Schlesier and **P. G. Richards:** Comparison of models and data at Millstone Hill during the 5–11 June 1991 storm 263

M. V. Codrescu, S. E. Palo, X. Zhang, T. J. Fuller-Rowell and **C. Poppe:** TEC climatology derived from TOPEX/POSEIDON measurements 281

N. Jakowski, S. Schlüter and **E. Sardón:** Total electron content of the ionosphere during the geomagnetic storm on January 10 1997 299

J. Aarons and **B. Lin:** Development of high latitude phase fluctuations during the January 10, April 10–11, and May 15, 1997 magnetic storms 309

B. A. Emery, C. Lathuillere, P. G. Richards, R. G. Roble, M. J. Buonsanto, D. J. Knipp, P. Wilkinson, D. P. Sipler and **R. Niciejewski:** Time dependent thermospheric neutral response to the 2–11 November 1993 storm period 329

Number 5

K. Charles and **G. O. L. Jones:** Mesospheric mean winds and tides observed by the imaging Doppler Interferometer (IDI) at Halley, Antarctica 351

A. G. Beard, N. J. Mitchell, P. J. S. Williams and **M. Kunitake:** Non-linear interactions between tides and planetary waves resulting in periodic tidal variability 363

M. N. Sasi, L. Vijayan, V. Deepa and **B. V. Krishna Murthy:** Estimation of equatorial wave momentum fluxes using MST radar winds observed at Gadanki (13.5°N, 79.2°E) 377

W. Wang, T. L. Killeen, A. G. Burns and **R. G. Roble:** A high-resolution, three-dimensional, time dependent, nested grid model of the coupled thermosphere-ionosphere 385

R. Sekar and **E. A. Kherani:** Effects of molecular ions on the Rayleigh–Taylor instability in the night-time equatorial ionosphere 399

R. A. Heelis: Ionization layers observed at middle latitudes by Atmospheric Explorer-C 407

R. G. Ezquer, M. A. Carbrera and **J. R. Manzano:** Predicted and measured electron density at 600 km altitude in the South American peak of the equatorial anomaly 415

Book reviews 423

Number 6

P. B. C. Ren, Y. Gjessing and **F. Sigernes:** Measurements of solar ultraviolet radiation on the Tibetan Plateau and comparisons with discrete ordinate method simulations 425

P. Keckhut, F. J. Schmidlin, A. Hauchecorne and **M. L. Chanin:** Stratospheric and mesospheric cooling trend estimates from U.S. rocketsondes at low latitude stations (8°S–34°N), taking into account instrumental changes and natural variability 447

R. L. Walterscheid, J. H. Hecht, R. A. Vincent, I. M. Reid, J. Woithe and **M. P. Hickey:** Analysis and interpretation of airglow and radar observations of quasi-monochromatic gravity waves in the upper mesosphere and lower thermosphere over Adelaide, Australia (35°S, 138°E)..... 461

G. G. Didebulidze and **A. D. Pataraya:** Ionosphere F2-region under the influence of the evolutional atmospheric gravity waves in horizontal shear flow..... 479

R. A. Akmaev: A prototype upper-atmospheric data assimilation scheme based on optimal interpolation: 1. Theory..... 491

R. A. Akmaev: A prototype upper-atmospheric data assimilation scheme based on optimal interpolation: 2. Numerical experiments 505

Book review 519

Number 7

S. V. Veretenenko and **M. I. Pudovkin:** Variations of solar radiation input to the lower atmosphere associated with different helio/geophysical factors 521

Å. Rabbe and **S. H. H. Larsen:** Ozone distribution in winter at high latitudes in the northern hemisphere 531

G. Cevolani, A. Hajduk, M. Hajduková, V. Porubčan and **G. Trivellone:** Ozone concentration at meteor heights determined from forward-scatter radar echoes 539

J. A. Gardner, A. L. Broadfoot, W. J. McNeil, S. T. Lai and **E. Murad:** Analysis and modeling of the GLO-1 observations of meteoric metals in the thermosphere..... 545

S.-R. Zhang, S. Fukao and **W. L. Oliver:** Data modeling and assimilation studies with the MU radar 563

Number 8

S. Nozawa and **A. Brekke:** Seasonal variation of the auroral E-region neutral wind for different solar activities..... 585

R. Raghavarao, R. Suhasini, H. G. Mayr, W. R. Hoegy and **L. E. Wharton:** Equatorial spread-F (ESF) and vertical winds 607

E. L. Afraimovich, V. A. Kobzar and **K. S. Palamartchouk:** Determining the drift velocity of ionospheric irregularities by analyzing three mutually orthogonal projections of the HF radio signal field vector..... 619

A. F. Yakovets, M. Z. Kaliev and **V. V. Vodyannikov:** An experimental study of wave packets in travelling ionospheric disturbances 629

Book Review 641

Product Review 643

Number 9

Y.-H. Chu and **C.-L. Su:** Range resolution dependence of VHF radar returns from clear-air turbulence and precipitation 645

F. Bertin, P. F. J. van Velthoven, P. Bessemoulin, R. Ney and **M. Massebeuf:** Wave-turbulence interactions observed in the lower stratosphere by the PROUST UHF radar and GPS radiosoundings 663

F. Yi: Resonant interactions between propagating gravity wave packets 675

Y. M. Yampolski, V. S. Beley, S. B. Kascheev, B. V. Lazebny, V. E. Paznukhov and **A. G. Rokhman:** Cross-mode modulation effect in Schumann resonances 693

D. L. Hysell: Imaging coherent backscatter radar studies of equatorial spread *F* 701

A. J. Foppiano, L. Cid and **V. Jara:** Ionospheric long-term trends for South American mid-latitudes 717

Number 10

K. Parameswaran and **R. Rajan:** An analytical model for the altitude variation of aerosol number densities in the coastal atmospheric boundary layer 725

J. Nieke, B. Pflug and **G. Zimmermann:** An aureole-corrected Langley-plot method developed for the calibration of HiRES grating spectrometers 739

M. Füllekrug, A. C. Fraser-Smith, E. A. Bering and **A. A. Few:** On the hourly contribution of global cloud-to-ground lightning activity to the atmospheric electric field in the Antarctic during December 1992 745

G. G. Belyaev, A.Yu Schekotov, A. V. Shvets and **A. P. Nickolaenko:** Schumann resonances observed using Poynting vector spectra 751

M. Takeda: Time variation of global geomagnetic Sq field in 1964 and 1980 765

M. H. Denton, G. J. Bailey, Y. Z. Su, K-I. Oyama and **T. Abe:** High altitude observations of electron temperature and a possible north–south asymmetry 775

L. Iyer, V. Jayaraman and **V. H. Kulkarni:** Effect of the charged dust grains on the neutral induced low frequency drift instability in a weakly ionized and magnetized dusty plasma 789

Number 11

Rapid Communication

K. Gierens and **M. Ponater:** Comment on "Variation of cosmic ray flux and global cloud coverage — a missing link in solar-climate relationships" by H. Svensmark and E. Friis-Christensen (1997) 795

P. V. Kishcha, I. V. Dmitrieva and **V. N. Obridko:** Long-term variations of the solar-geomagnetic correlation, total solar irradiance, and northern hemispheric temperature (1868–1997)..... 799

A. Manson, C. Meek, M. Hagan, C. Hall, W. Hocking, J. MacDougall, S. Franke, D. Riggin, D. Fritts, R. Vincent and **M. Burrage:** Seasonal variations of the semi-diurnal and diurnal tides in the MLT: multi-year MF radar observations from 2 to 70°N, and the GSWM tidal model... 809

T. S. Trondsen, W. Lyatsky, L. L. Cogger and **J. S. Murphree:** Interplanetary magnetic field By control of dayside auroras..... 829

M. L. Parkinson, P. R. Smith, P. L. Dyson and **R. J. Morris:** Nowcasting convection velocity in the high-latitude ionosphere using statistical models..... 841

L. A. Hajkowicz: Monitoring ionospheric response to auroral electrojet activity from sub-auroral to equatorial latitudes in the East Asian-Australian longitudinal sector over a solar cycle (1978–1986) 857

J. F. Lemaire: Hydrostatic equilibrium and convective stability in the plasmasphere..... 867

Number 12

L. A. Frank and **J. B. Sigwarth:** A search for coastline effects on the auroras..... 879

V. G. Sinitsin, M. C. Kelley, Yu. M. Yampolski, D. L. Hysell, A. V. Zalizovski and **P. V. Ponomarenko:** Ionospheric conductivities according to Doppler radar observations of stimulated turbulence 903

J. Du and **R. J. Stening:** Simulating the ionospheric dynamo—I. Simulation model and flux tube integrated conductivities..... 913

J. Du and **R. J. Stening:** Simulating the ionospheric dynamo — II. Equatorial electric fields. 925

Erratum 941

Number 13

D. W. Engfer and **B. A. Tinsley:** An investigation of short-term solar wind modulation of atmospheric electricity at Mauna Loa Observatory 943

W. Kundt and **G. Thuma:** Geoelectricity: atmospheric charging and thunderstorms..... 955

B. W. Jones: Shadow bands during the total solar eclipse of 26 February 1998 965

Ch. Jacobi, Yu. I. Portnyagin, T. V. Solovjova, P. Hoffmann, W. Singer, A. N. Fahrutdinova, R. A. Ishmuratov, A. G. Beard, N. J. Mitchell, H. G. Muller, R. Schminder, D. Kürschner, A. H. Manson and **C. E. Meek:** Climatology of the semidiurnal tide at 52–56°N from ground-based radar wind measurements 1985–1995..... 975

B. J. Srivastava, H. Abbas, D. R. K. Rao and **B. M. Pathan:** Extended main phase of some sudden commencement great geomagnetic storms with double SSCs 993

R. Sridharan, A. Taori, D. Chakrabarty, H. Chandra, S. Sharma, R. Narayanan and **N. K. Modi:** Effects of 6 January 1997 space weather related processes in the low latitude thermosphere–ionosphere system..... 1001

P. Nenovski: Asymmetry in the electric and magnetic field polarization of geomagnetic pulsations..... 1007

Number 14

B. W. Jones: A search for atmospheric pressure waves from the total solar eclipse of 9 March 1997 1017

P. A. Greet, M. G. Conde, P. L. Dyson, J. L. Innis, A. M. Breed and **D. J. Murphy:** Thermospheric wind field over Mawson and Davis, Antarctica; simultaneous observations by two Fabry–Perot spectrometers of **λ630 nm emission** 1025

J. L. Innis, P. A. Greet, D. J. Murphy, M. G. Conde and **P. L. Dyson:** A large vertical wind in the thermosphere at the auroral oval/polar cap boundary seen simultaneously from Mawson and Davis, Antarctica 1047

E. S. Kovalenko and **N. A. Zabotin:** Multiple scattering effects under vertical sounding of equatorial ionosphere 1059

H. J. Strangeways: Lightning induced enhancements of D-region ionisation and whistler ducts 1067

R. P. Singh, D. K. Singh, A. K. Singh, D. Hamar and **J. Lichtenberger:** Application of matched filtering and parameter estimation technique to low latitude whistlers 1081

Number 15

B. Soukharev: On the solar/QBO effect on the interannual variability of total ozone and the stratospheric circulation over Northern Europe 1093

S. P. Namboothiri, T. Tsuda and **T. Nakamura:** Interannual variability of mesospheric mean winds observed with the MU radar 1111

E. Hermawan and **T. Tsuda:** Estimation of turbulence energy dissipation rate and vertical eddy diffusivity with the MU radar RASS 1123

R. Sridharan, A. Taori, S. Gurubaran, R. Rajaram and **M. G. Shepherd:** First results on daytime mesopause OH rotational temperatures using ground-based photometry from equatorial latitudes 1131

R. Sridharan, D. Pallam Raju, V. V. Somayajulu, A. Taori, D. Chakrabarty and **R. Raghavarao:** Imprint of equatorial electrodynamical processes in the OI 630.0 nm dayglow 1143

J. J. Sojka, R. W. Schunk, M. David, J. Chen, S. Slinker and **J. Fedder:** Interhemispheric comparison of TDIM E- and F-region ionospheres on 14 January 1988 1157

K. Hocke, A. G. Pavelyev, O. I. Yakovlev, L. Barthes and **N. Jakowski:** Radio occultation data analysis by the radioholographic method 1169

D. J. Della-Rose, J. J. Sojka and **L. Zhu:** Resolving geomagnetic disturbances using "*K*-like" geomagnetic indices with variable time intervals 1179

Number 16

GPS Applications to the Structure and Dynamics of the Earth's Oceans and Ionosphere: Measurement, Analysis, Instrument Calibration, and Related Technologies

Preface 1195

A. Komjathy and **G. H. Born:** GPS-based ionospheric corrections for single frequency radar altimetry..... 1197

B. A. Iijima, I. L. Harris, C. M. Ho, U. J. Lindqwister, A. J. Mannucci, X. Pi, M. J. Reyes, L. C. Sparks and **B. D. Wilson:** Automated daily process for global ionospheric total electron content maps and satellite ocean altimeter ionospheric calibration based on Global Positioning System data..... 1205

S. Basu, K. M. Groves, J. M. Quinn and **P. Doherty:** A comparison of TEC fluctuations and scintillations at Ascension Island 1219

A. J. Mannucci, B. Iijima, L. Sparks, X. Pi, B. Wilson and **U. Lindqwister:** Assessment of global TEC mapping using a three-dimensional electron density model..... 1227

M. Hernández-Pajares, J. M. Juan and **J. Sanz:** New approaches in global ionospheric determination using ground GPS data..... 1237

Number 17

Y. Zhang, D. J. McEwen, N. Kong, J. J. Sojka and **L. Zhu:** Horizontal electrojet associated with the sun-aligned arcs 1249

J. E. Salah, L. P. Goncharenko, D. P. Sipler, R. R. Clark and **R. J. Tate:** Common-volume measurements of mesospheric winds using radar and optical instruments: 1. Comparison of observations..... 1259

R. R. Clark, R. J. Tate, J. E. Salah and **L. P. Goncharenko:** Common-volume measurements of mesospheric winds: 2. Small scale structure implications 1273

C. T. Russell, P. J. Chi, V. Angelopoulos, W. Goedecke, F. K. Chun, G. Le, M. B. Moldwin and **G. D. Reeves:** Comparison of three techniques for locating a resonating magnetic field line . 1289

S. Thulasiraman, J. B. Nee, W. N. Chen and **J. H. Chen:** Temporal characteristics of tropopause and lower stratosphere over Taiwan during 1990–1995..... 1299

R. M. Wilson: Variation of surface air temperatures in relation to El Niño and cataclysmic volcanic eruptions, 1796–1882..... 1307

Erratum 1321

Number 18

Editorial..... 1323

Review Paper
R. P. Kane: Some characteristics and precipitation effects of the El Niño of 1997–1998 1325

A. V. Frank-Kamenetsky, G. B. Burns, O. A. Troshichev, V. O. Papitashvili, E. A. Bering and **W. J. R. French:** The geoelectric field at Vostok, Antarctica: its relation to the interplanetary magnetic field and the cross polar cap potential difference..... 1347

W. Wan, M. L. Parkinson, P. L. Dyson, A. M. Breed and **R. J. Morris:** A statistical study of the interplanetary magnetic field control of sporadic *E*-layer occurrence in the southern polar cap ionosphere..... 1357

S.-R. Zhang, S. Fukao, W. L. Oliver and **Y. Otsuka:** The height of the maximum ionospheric electron density over the MU radar 1367

A. G. Beard and **D. Pancheva:** A possible cause for the generation of unusually strong ~20- and 30-hour oscillations in the neutral wind of the lower thermosphere 1385

S. Adler-Golden, D. R. Smith, J. Vail, A. Berk, R. Nadile and **L. Jeong:** Simulations of mesospheric and thermospheric IR radiance measured in the CIRRIS-1A shuttle experiment 1397
